

Heat Mate

Professional Heat Induction Heater

Common workshop processes become a breeze including the unseizing of bolts, track rod ends and ball joints.

The Heat Mate Induction Heater is the perfect partner to any Hofmann Megaplan premium wheel alignment solution.

Key Features...

- Takes seconds to heat ferrous based metal
- Plug it in, switch on and you're ready
- Finger point accuracy allows for close proximity to heat-sensitive parts
- Water-cooled components mean longer usage times
- The flameless solution means no naked flame or excessive heat
- Cheaper by up to 50% vs oxyacetylene

Included As Standard...

- Control panel interface with key pad and leds with 5 heat output levels
- Power board unit
- Hydraulic radiator group
- Inductor transformer cable (3 metres)

Technical Specifications

Input Power	3.5 Kw – 7 6A
Voltage	230V/7 PH+T 50
Working Frequency	5 – 30 Khz
Duty Cycle	9 mins (*± 5% based on 20°C room temperature@ max power)
Cable Length	2 metres
Tank Capacity	2 litres
Dimensions	500 x 250 x 280 mm
Weight	13 kg
