

## 24" Semi-automatic 2D Wheel Balancer

**Small on price but big on features, the RB825 24" semi-automatic 2D wheel balancer is, in our view, the best budget wheel balancer money can buy.**

Auto 2D data entry and motorised spin minimise your time at the balancer, while ensuring balancing accuracy. This semi-automatic wheel balancer can balance most passenger car and light commercial rims currently available on the market.

Max weight weight	65 kg
Rim diameter	10"-24" (255mm-610mm)
Rim width	1.5"-20" (39mm-510mm)
Shaft diameter	40mm
Balance accuracy	+/- 1g
Balancing speed	200 rpm
Measuring time	8 seconds
Noise level	<70db
Power supply	Single phase 230V, 13 Amp
