Atlas Platinum Tyre Machinery

PWB90 Premium 3D Sonar Wheel Balancer

NEW!

Super Automatic Wheel Balancing!

The PWB90 is the latest high-performance wheel balancer from American Tyre Equipment giant, Atlas Auto Equipment. With a high-resolution monitor display, it is not only extremely user-friendly but will also impress your customers! This is a balancer that means business!

Fast Functions, Quick Balancing, Accuracy Guaranteed

The Fast & Easy Split function (FE5) makes hiding adhesive weights behind the spokes a breeze and the Opposite Weight Function (OWF), allows the operator to change the weight application position from 12 o'clock to 6 o'clock for convenient access when applying adhesive weights. Optimisation of tyre and wheel unbalance (match mounting) is possible with the PWB90 via OPTIMATCH software and makes balancing even the most difficult assemblies easy and efficient.

Make no mistake, the PWB90 is a real top of the line wheel balancer, competing with those big name brands seen as the benchmark for premium quality.

This model guarantees speed, accuracy, and long life by combining Italian engineering and components with the Factory Direct Value that ATLAS is known for around the world.

Delivery & Installation Included!

Ross – 5 Stars – 21/07/18

"Always have good service from this company. Used them a good few times and the experience has been positive every time. Prices are generally competitive and whilst the postage cost can be a bit pricey, the delivery is very quick, so happy to pay for it. Including the delivery charge, overall, they are still competitive. I will continue to get my supplies from them."
